

## Software: Enterprise Energy Management

### Description

enteliWEB is a web based application that combines the power of enterprise dashboards with easy to use facility management tools. Customizable Energy Management dashboards and powerful energy reports give managers the tools to reduce consumption and lower costs. Task driven alarm management and system dashboards allow operators to quickly visualize and prioritize their work, keeping the facility running comfortably and efficiently.

enteliWEB

### Application

enteliWEB is designed to make Energy Management and Building Operation simple. Powerful dashboard visualizations allow you to go from dashboard energy graphs to consumption reports with a single click.

Dashboards are task driven, automatically providing operators with the information they need without having to search for it. Drilling down from high level operational views to specific parts of the system is simple and intuitive.

### System Requirements

#### Server Operating System

Microsoft® Windows® XP  
Windows Server® 2000  
Windows Server® 2003  
Windows Server® 2008  
Windows Vista®  
Windows® 7

Ubuntu 8 / 9

#### Client Operating System

Microsoft® Windows® XP  
Windows Server® 2000  
Windows Server® 2003  
Windows Server® 2008  
Windows Vista®  
Windows® 7

Mac OS X v10.4

Mac OS X v10.5

#### Client Browser

Internet Explorer® 8  
Firefox®  
Google Chrome™ browser  
Safari®

## Software: Enterprise Energy Management

### Features

- **Enterprise Dashboards** provide high level information in easy to understand graphical formats, to help easily manage facility KPI's.
- **System Dashboards** make operating your facility easy, by aggregating system graphics, alarm management, energy information, and much more into a single dashboard screen.
- **Energy Reports** provide detailed graphical and tabular data from your meters, to help make informed operational and policy decisions.
- **Alarm Management** is made simple with intelligent visualizations, alarm assignment, and operator comments.
- **Version Independent** software allows organizations to operate an entire WAN without having to worry about firm-ware versions in the hardware.
- **Multiple Independent Sites** can be managed from a single login.
- **Platform Independent** web software gives you the choice of Windows® or Linux® for your host server.
- **Browser Independence** gives you the choice of using virtually any browser, including Internet Explorer®, Firefox®, Google Chrome™ browser, and Safari®.
